

Safety-Kleen is uniquely qualified to enable our customers to reduce harm on the environment.

In other words, Safety-Kleen strives to increase the value of their customers' businesses by helping balance their sustainability objectives with their financial goals. They do this better than others by providing the most comprehensive protection, the widest range of sustainable choices and the highly experienced and trained people necessary to **Make Green Work**.

With more than 50 years of experience, Safety-Kleen is recognized as a trusted provider of environmental solutions to over 200,000 customer locations, delivering responsible closed-loop solutions for managing many of their customers' waste streams. These solutions allow them to recycle, reclaim and reuse both used oil and spent cleaning solvent. This system conserves natural resources, reduces customers' environmental liability, and provides economic advantages through the reduction of costs and the sale of recovered products.

Services and products:

OIL SOLUTIONS. Safety-Kleen owns and operates the three largest oil re-refineries in North America, collecting and processing more than 220 million gallons of oil per year.

CLEANING SOLUTIONS. Safety-Kleen is the largest collector and recycler of used solvent in North America, processing 11 million gallons of cleaning solvent annually. They leverage their brand and their leading national market position in parts cleaning services to offer a complimentary line of Safety-Kleen branded products that include hand, floor and general-purpose cleaners, as well as, spill kits, absorbents and cleaning aerosols.

ENVIRONMENTAL SOLUTIONS. Safety-Kleen is also a leading provider of containerized waste and vacuum services, industrial waste management, total project management and compliance services to a wide range of customers. From used oil re-refining and industrial waste services to environmental project management and advanced parts cleaning technologies, Safety-Kleen can help!

Safety-Kleen is a leading provider of environmental services to commercial, industrial and automotive customers.

They are the largest re-refiner of used oil and provider of parts cleaning services in North America. Their broad selection of environmentally responsible products and services ensure the proper collection, processing, re-refining, recycling and disposal of hazardous and non-hazardous materials.
